

Meet

Flock Fighters USA.

Flock Fighters USA is the nation's leader in chemical bird aversion! We have been exclusively focused on Control Ornithology and the practice of IPM (Integrated Pest Management) in nuisance bird control since 1998.

Flock Fighters USA is one of the oldest bird control companies in the US, and is experienced in the application of all Methyl Anthranilate (MA) products: we have expelled more birds than any other applicator. We also supply more product and equipment than any other supplier.

Flock Fighters USA recognizes that each site is unique in need: by geography, by climate, by function, and by numbers and species of birds. We administer technologies and procedures to match the requirements of each site and species of birds.

Flock Fighters USA provides our clients with variable options: We will design and implement a solution specifically designed for the requirements of your site. If you would like to implement the system yourself, we will provide you with the training and support necessary to help you control your nuisance birds.

Flock Fighters USA continues to lead the way in aerosol bird aversion through the development and utilization of new technologies.

Flock Fighters USA takes seriously our personal connection with our clients. For more than a decade, we've been fortunate to develop relationships with many of our customers. We are proud when our assistance results in their satisfaction: each client's success is our own, as well. We are committed to your success in creating a safe, healthy environment.

While many control companies may promote one process and sell a single item (one size fits all control), we take the time to design customized solutions for our clients' needs. We are consultants as well as problem-solvers: Because of our understanding of the birds and the products, we are able to resolve challenges efficiently and effectively.

If you don't understand the species of bird you're dealing with, you won't be able to find the solution to removing them.

-Jeff Ling, Owner

We are dedicated to the success of our clients, and we therefore provide all the necessary support in the expulsion of your nuisance birds.

We would be happy to discuss with you the requirements of your site. Please feel free to contact us with any questions you may have.

The Nation's Leader in Chemical Bird Aversion

The Nation's Leader in Integrated Pest Management

The first rule of Wildlife Management Theory: Habitat Controls Animal Populations.

For many industrial and commercial sites, the innate characteristics of the site are an inducement for nuisance birds to reside. The simple fact is that man-made environments create comfortable places for birds to roost, feed and nest. Therefore, synthetic ecosystems are bird habitats and provide support for birds' behavior.

Unfortunately, when human habitats become bird habitats, there are many nuisance consequences that result. How can we reclaim our environments for our own use? Until recently, there have been few options for the control of nuisance birds; many gimmicks have been promoted, proven to be failures and discarded. Nuisance bird populations and the problems associated with them continue to grow.

Fortunately, Flock Fighters USA has dedicated more than a decade to the study of nuisance birds and bird aversion. We have worked on some of the most difficult scenarios in the world, and we are the nation's leader in Integrated Bird Management.

Since 1998, Flock Fighters has provided the consulting, services, and supplies for bird control for many different companies across the US. We consistently lead the way in scientific bird control and the implementation of IPM practices. Our reputation is built on the utilization of any and all products proven in the field: no toys, trinkets, or snake oils.

We are consultants first and problem solvers second: we identify the problem unique to your site, and then we focus on designing species-specific plans for success. We understand that there's nothing more expensive than a product that doesn't work. Applying a \$10,000 solution to a \$100 problem isn't cost-effective or wise. The converse is also true: A large scale

problem won't be solved with a \$500 fogger. This is why Flock Fighters takes the time to analyze your site and your birds' focus. We will then be able to diagnose your problem correctly and put the proper solution into operation.

You don't have to deal with the consequences of nuisance birds any longer! Flock Fighters will design the specific solution that will work for you, saving you time, money and frustration.

Offering everything you need for effective bird control:

SUPPORT

- Consultation
- Site and problem analysis
- Action plan and procedural formulation
- Post application assessment

SUPPLIES

- The right equipment required
- The chemical needed for the job

SERVICES

- Turnkey operations and services by professional applicators - On your site at the right time

SYSTEMS

- Control any size of site and any amount of space
- Automatic controls engineered to operate in any environment for permanent bird expulsion.

What Clients are Saying About Flock Fighters USA:

"The chemical we are currently using seems to be working well. I believe it can be very successful as long as you follow Jeff's instructions for application. Very important to do as he instructs and to stay with the program he outlines for each specific application. The chemical itself appears to be safe to use, as directed, around equipment within any of the plant facilities. I see no problems with using it."

Dallas Pichnic, Dow Chemical

"Jeffrey looks at each situation very closely and determines the best method and best equipment to correct that particular situation. He works well with the client in describing each step of the process."

Jim Werner, Collins Pest Control

"Flock Fighters USA has been a key distributor and turnkey service provider for Rejex-it since 1998. Their expertise, knowledge and attention to solving problems has made them one of the foremost avian experts globally."

Devlin Reynolds, Natural Forces

"Jeff Ling is the national leader in the field of bird aversion techniques. His knowledge and experience is without peer. I give him my highest professional recommendation!"

Gene Hyde, City Forester, Chattanooga, TN
