

Greetings,

Thank you for stopping by our booth at the convention and discussing solutions for controlling "your" nuisance birds.

Throughout the years, people have tried many solutions for controlling nuisance birds. Most of them have been proven as failures and discarded... just as ineffective as a scarecrow in a cornfield. Unfortunately, many bird control products sold today are just as useless, and are far less attractive!

**Bird control made simple...  
unfortunately, it's also ineffective.**

All sites, no matter how unique, share the many realities nuisance birds bring extra costs:

- ... of manure cleanup**
- ... of contaminated materials**
- ... of equipment repair**
- ... for safety, health and hygiene exposure and accidents**
- ... of polluted products**
- ... of employees who hesitate to work in soiled areas**
- ... of ineffective bird control products!**

What does that mean for you? How can you eliminate the problems associated with your nuisance birds?

Since 1998, Flock Fighters USA has led the way in scientific bird control and the implementation of IPM (Integrated Pest Management) practices. While many control companies focus on one type of product or solution, we recognize that not all bird problems are the same and can't be solved in the same way. Instead, we devise a specific solution for each site—when it comes to bird control, one size DOESN'T fit all! Our reputation is built on the utilization of any and all products proven in the field: no toys, trinket, or snake oils. We continue to develop and implement new technologies.

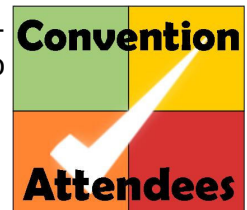

**Please check out our web site, [www.flockfighters.com](http://www.flockfighters.com).** There is information there to help you learn more about the issues and some of the available solutions in nuisance bird management. Click on "Convention Attendees" page to download or forward the Convention packet.

Please contact me personally with your questions.

Regards,
