

Beak Speak

A publication of **Flock Fighters USA**

Summer, 2005

Upcoming Events

Flock Fighters USA will be attending these upcoming events:

Kentucky Pest Control Short Course; Oct. 4-6 in Lexington, KY.

National Blueberry Growers Conference; Oct. 10-12 in Grand Rapids, MI.

If you're attending, be sure to stop by our booth and say hello. We'd be happy to discuss the specifications of YOUR site.

Let's talk birds!

Did you know?

- MA is also used to flavor Grape Kool-Aid as well as the strawberry milkshakes distributed by McDonalds!
- Flock Fighters USA gives out grape (MA-Flavored) lollipops at all of its conventions.
- BITREX, the active ingredient in Tree Guard, is the most bitter substance known to man.

NEW: National Support

Imagine... You find you have a problem with nuisance birds on your site. You purchase a product that will eliminate those birds, and you can't wait to use it. The thought of eliminating the problems the birds are causing on your site makes you smile with joy. You open the container and think to yourself... **"NOW WHAT?!"**

NOW there is help!

NOW, all consumers will be able to have their questions answered by an expert.

NOW, customers from anywhere in the US can dial one toll-free number for assistance.

NOW, virtually any site can be bird-free efficiently and affordably with Fog Force, Migrate and Crop Guardian.

Jeff Ling, eliminates birds in an airplane hangar.

Flock Fighters USA has been selected to provide NATIONAL support for Fog Force, Crop Guardian and Migrate.

The company already excels in customer support, says Jeff Ling, President of Flock Fighters USA. "We were the first to use the Rejexit product line, and we are the most skilled in application. We are excited that this change will provide many more people with the benefit of our knowledge and experience."

Toll-Free: 1-866-53-BIRDS

3 MA Products by Rejexit

Fog Force is a bird repellent that may be used indoors and outdoors to repel all types of birds, including starlings, blackbirds, gulls, Canada geese and any other bird that has become a nuisance or a health hazard in an area. Fog Force is best applied by a thermal or ULV fog generator.

Migrate is a goose repellent for turf areas such as golf courses, lawns, parks, athletic fields, cemeteries or other areas where birds graze. It is a micro-encapsulated product that should be mixed with water. Migrate can also be tank mixed with most other turf products.

Crop Guardian is a bird repellent that is used to reduce damage to berry crops. It is approved to be used on grapes, blueberries and cherries, and protects against all types of birds. Crop Guardian has no harvest intervals, although Flock Fighters USA recommends that no applications be made seven days before harvest.

FLOCK FIGHTERS

U S A

'the nation's leader in chemical bird aversion'

Rejexit Support Line: 1-866-53-BIRDS

Mid to late August is a good time to begin your goose aversion efforts. It is at this point, in late summer, when goslings, or baby geese, are learning how to fly. This is a significant control opportunity for these new birds.

Fall Goose Control

NOW is the perfect time to order Fog Force and Migrate so that you are ready when your site is! These products are proven in tests across America... put them to work for you! For more information about our products, see www.flockfighters.com.
You can order today! Call Flock Fighters: (800) 489-6651

Got Deer?

Tree Guard is a pre-mixed, ready-to-use mammal repellent that sprays on milky and dries clear. The active ingredient, bitter tasting Bitrex, is locked onto the plant surface forming a "protective jacket" which resists dew, snow, rain and vaporization. The result is an effective, long-lasting, repellent proven throughout America.

Wine Grape Growers:

Receive **10%** off on orders of 10 gallons or more of Crop Guardian.
"Two applications for better control, a better price."

Call: 800.489.6651 to order by September 1

Case lots only. Use coupon code USCG20 when ordering.

A flock of 500 blackbirds or other small fruit eaters will consume over 100 lbs. of fruit each day and will damage or pollute twice as much as they eat. NOW is the critical period to protect your grapes— and your profit— from nuisance birds! Apply Crop Guardian directly to the fruit to protect your site from the losses that are caused by nuisance birds. **Order today!**
